Line 7-

PALM TREE TRIMMING

All large-growing palms should be pruned to remove dead fronds, and fronds with a petiole that droops below horizontal. Dead fronds are those with less than 50% green tissue. Only those fronds with petioles drooping below horizontal (9:00-3:00 o'clock) should be removed. All seedpods should also be removed including those originating among remaining fronds. When removing fronds and seedpods, care should be taken so those fronds that are to remain are not nicked or wounded.

All other information stands as previously stated. Inquires may be directed to Priscilla Waring Lee at pml@chacity.org, (843) 720-5345 or fax (843) 973-3481
